PROFILE

Machine Learning Scientist with over 3 years of diverse experience in both industry and research, specializing in Generative AI, Diffusion Models, LLMs, and MLOps. Demonstrated success in designing, deploying, and optimizing large-scale machine learning systems that drive significant business outcomes. A Canadian citizen, eligible for employment in the U.S. under a TN visa.

EXPERIENCE

Senior Machine Learning Scientist

Apr 2025 — Current

Lily AI

Mountain View, CA (Remote)

- Designed a RAG pipeline using a panel of LLMs and an AI judge, improving attribution F1 score by ~25% across diverse product types while reducing token usage by ~10%
- Optimized LLMs to extract high-value attributes, enhancing revenue through improved onsite Google Ads performance.
- Trained deep learning models using self-supervision and attention, delivering an additional 10% boost in F1 score
- Designed scalable ML pipelines and inference systems to support large-scale production environments
- Collaborated cross-functionally with engineers and domain experts to improve model scalability and operational efficiency

Machine Learning Engineer

Sep 2020 — Jul 2022

Scenebox

Vancouver, BC

- Deployed AWS-managed Kafka for event streaming, cutting message processing time by 10%
- Built and optimized a similarity search service using the FAISS library, retrieving 10k images in < 300m
- Optimized similarity search engine, improving data relevance by aligning results with client preferences and exploring embedding alignment for cross-modal applications
- Streamlined the integration of AWS SageMaker GT, achieving a 30% reduction in annotation turnaround time for over 5 enterprise clients within 3 days of the feature request.
- Migrated asset management from Elasticsearch to PostgreSQL, reducing query latency by 20%

EDUCATION

MASc in Electrical & Computer Engineering

Aug 2022 — Mar 2025

University of British Columbia

Vancouver, BC

BASc in Electrical & Computer Engineering

Apr 2019 — Jul 2019

University of British Columbia

Vancouver, BC

PROJECTS

Stock Analysis Assistant

Nov 2024 — Dec 2024

- Co-developed a browser extension leveraging Llama3.2-11b to analyze stock market charts, introducing real-time insights into potential chart movements for improved trading decisions
- Developed a robust pipeline allowing the extension to capture the screen and utilize a VLM to analyze the potential direction for the chart shown on the screen
- Added LLM agents capable of analyzing different aspects of each chart for more accuracy
- Collaborated on enabling users to select from a variety of paid or free models as the analysis agent

ResumeAI

Aug 2024 — Nov 2024

- Collaborated in developing a job-finding platform to generate tailored resumes by scraping job descriptions and user resumes.
- Deployed agentic LLMs with different roles and tools, resulting in fewer mistakes and hallucinations when finetuning resumes
- Improved config management by adding support for YAML files support

- Developed a vision transformer for cardiac cycle classification and heart failure estimation, enhancing accuracy by about 3%
- Attained 85% concurrent accuracy in the classification of end-diastolic and end-systolic frames

TECHNICAL SKILLS

Programming: Python, C/C++, SQL, NoSQL

Machine Learning: Diffusion Models, DiTs, ViTs, LLMs, LLM agents, VLMs, Video Understanding, Model Distillation

Frameworks: Hugging Face, LangChain, CrewAI, Diffusers, Transformers, PySpark, PyTorch

DevOps Tools: AWS, Azure, Kubectl, Helm, Airflow, Kafka, Docker, CI/CD pipelines

AWARDS

Graduate Support Initiative (GSI) (CAD \$2,000)

- Selective award for top graduate students with impactful research topics

Canada Graduate Scholarship (CGS-M) (CAD \$17,000)

- Prestigious award granted to exceptional graduate students nationwide, recognizing contributions to their field of study

Undergraduate Student Research Award (NSERC USRA) (CAD \$8,500)

- Prestigious award granted to students who demonstrate exceptional academic and research achievements

MISCELLANEOUS

Certificates:

- IEEE Transactions on Medical Imaging Distinguished Reviewer Certificate 2024

Academic Services:

- Reviewer for the workshop on Adaptive Foundation Models, NeurIPS 2024
- Reviewer for IEEE Transactions on Medical Imaging (TMI) 2024
